From Analog to IoT™ Jaguar Software Tools

Jaguar Exploration, Inc., started a Software Division to develop a suite of software products to help oil and gas companies supervise their activities from upstream to downstream on an integrated platform: **JagSoft®**

JagSeis® and JagHSE®
Apps Always Available
Online or Offline

iPhone | Android | iPad | Tablet
TrimbleGPS

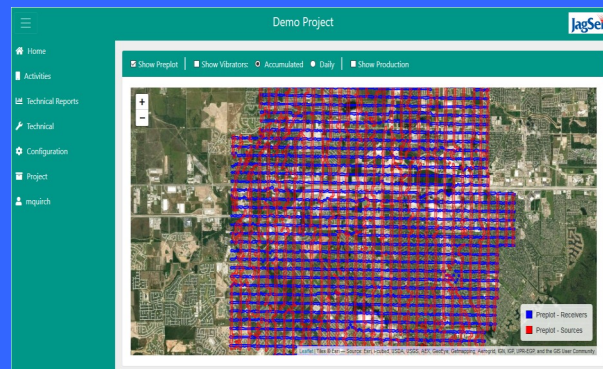

ONLINE/OFFLINE

JagSeis®, (US Patent 8,694,260B1), is a web and mobile solution that sets uniform procedures for QC's to effectively and consistently perform their activities.

The application enables collecting, analyzing and monitoring all phases of a seismic acquisition project.

A Worldwide Commitment to HSE Motivated JagSoft® to Develop an Exclusive Module!

JagHSE is a Web and Mobile App to follow up HSE performance configurable for any Industry and/or Activity

Features:

- >Inspection Plan according to Hazard & Risk Register
- >Inspection Maps
- >SMART Action Point Register
- >SMART KPI's
- >OMS Evaluation based on pre-defined criteria (Matrix)
- >OMS Status Viewer
- >Automatic Report Generation and Delivery
- >Alarms and Alerts
- >User Friendly Installation
- >Complete Security with User IDs, Roles and Permissions
